

# Repair & **C**alibration of NDT Equipment

# NDT MainCal Calibration Services

NDT MainCal was established in 1991 as a specialist calibration house for the NDT industry.

Its' founders jointly brought more than a hundred years experience in the NDT industry to the company.

Our customer base ranges from self-employed NDT operators to multinational organisations.

As NDT industry specialists, we offer free, friendly advice on such matters as customer specific calibration procedures to help meet the requirements of accreditation bodies such as NADCAP.

NDT MainCal aims to provide quality calibrations; to this end the company's quality system is ISO 9001.

All our calibration equipment is traceable to national or international standards.

Calibrations are carried out to national/international standards or agreed customer specifications.

The standard turnaround time for any calibration is 24 hours (excluding weekends and National Holidays).

Calibrated items can be returned fully insured by next day courier (UK only). For overseas customers, return transport of goods can be arranged.

'While you wait' calibrations are available by prior arrangement.

On site calibrations of MPI, dye penetrant, X-ray tube focal spot measurement and other fixed equipment is a speciality.

NDT MainCal can offer a cost effective service through the provision of a one-stop shop for all your NDT related calibration requirements.

NDT MainCal business continues to grow by focusing on the following key points

- Quality
- Fast turnaround
- Keen pricing
- Knowledgeable staff
